GUARANTEED ON TIME COMPLETION!

Overview

Despite the private pilot requirement of 40 hours of flight time, the average completion times are reported much higher, some sources cite as many as 80 hours. The commercial certificate and other ratings have a similar statistic. Many schools lack the structure or incentive to graduate students on time. This drives the cost far beyond the original estimates and prevents many from achieving their dreams at all. Colorado Highland Helicopters is offering a complete training package with guaranteed completion. Pilots can start from zero time through Commercial certification with an Instrument rating for one flat rate!

Highlights

Our Commercial Pilot Training Package offers all the benefits of training with Colorado Highland Helicopters.

- High altitude and mountainous terrain training that we are known for and pride ourselves upon.
- Training in both piston and turbine helicopters, providing a solid basis for employment, including meeting the Robinson R44 SFAR 73 requirements.
- Cutting edge simulator training in the VRM, virtual reality based full-motion simulator.
- All basic costs are included. From a Bose aviation headset, to ground training and written exam fees, everything you need is covered.

How it works

CHH will provide everything a student needs to become an FAA certified Commercial Pilot rated for instrument flight in helicopters but the student has to be diligent. Initial instruction is provided in the Hughes 369HS, also known as the MD500. This aircraft provides a fundamental basis in working helicopters and allows for transition to more advanced mountain flying as we move forward. The Robinson R44 meets the FAA Star 73 requirement necessary to operate that machine and provides instrument instruction in a modern glass panel configuration. During the commercial training we will revisit the MD500 and begin exploring its capable flight envelope in higher altitude terrain. Throughout the training for each certification we will incorporate the VRM simulator to develop proficiency.

COLORADO HIGHLAND HELICOPTERS

Student Obligations

In order for the guarantee to work, the contract will require the student to meet basic benchmarks for continued effort. No obligations or benchmarks are beyond the capability of anyone willing to put in the time and effort but regular attendance and progress with studying the material is required to maintain guaranteed completion. The obligations are highlighted below, be sure you are willing to put in the work!

- Schedule and attend at least four sessions per month.
- Each student must complete the ground study module for each stage before progressing to the next flight stage.
- Schedule and obtain a score of at least 85% on the corresponding FAA written exam for each ground module.
- Students that are unable to operate the simulator are not eligible for guaranteed completion.

If a student is unable to meet these requirements, all is not lost! CHH has a proven history of completing commercial student at or very near to the required hours without excessive overage. Its simply that we cannot guarantee completion for the flat rate pricing without these obligations being met by the student. This document is intended as an overview, other details and conditions apply and will be detailed before training begins.

COST/ PAYMENT STRUCTURE

Pay as you go!

The training package is offered for one flat rate but you do not need to pay all at once. Each payment will be triggered by completion of a benchmark. The next installment is due before training continues.

| Benchmark Description | Cost |
|---|----------------------|
| Training begins! | \$ 25,000.00 |
| Benchmark 1: 35 total helicopter hours + all <u>other</u> PPL req's met per FAR 61.109(c) | \$ 25,000.00 |
| Benchmark 2: 80 total helicopter hours + R44 SFAR 73 req's complete | \$ 25,000.00 |
| Benchmark 3: 120 total helicopter hours + Mountain course complete | \$ 25,000.00 |
| Total | \$ 100,000.00 |

If this package doesn't fit your needs, we have many options available. Please call to discuss your training needs.
